

LEODAVIN
THE INCUBATOR

OUR STORY

Leonardo da Vinci was one of the greatest creative thinkers during the Italian Renaissance.

Greatly influential as an artist, he created some of the worlds most famous paintings, like The Mona Lisa and The Last Supper.

However, his brilliant mind and his genius comes from his ability to merge science and art. His scientific understanding let him go beyond any limit, imagining inventions like the bicycle, airplane, helicopter and parachute.

The company founders Urs Ruggaber and Salvatore Gandolfo aim to follow this path.

The name LEODAVIN has been chosen on purpose. The founder, Urs Ruggaber is nicknamed "LEO" (an homage to Leonadro Davinci) due to his daily work of making the impossible possible, and the name VIN = Winner.

The name LEODAVIN will be used for all entities, such as Switzerland and USA.

" NO IS ONLY AN EXCUSE NOT TO TRY "

**LEODAVIN is the bridge between your ideas and reality;
we aim to bring your ideas to life.**

Urs Ruggaber and Salvatore Gandolfo, the founders of the company, are addicted to and inspired by the passion for innovation and novelties. With each over 25 years of experience in the developments business, they will join their know how and synergies, under the roof of LEODAVIN.

LEODAVIN is "The Incubator" that ensures ideas will always have the opportunity to successfully materialize.

Abstract ideas are welcome to the free thinking environment of LEODAVIN. Together we can create revolutionary ideas that can transform our world and society.

Ruggabers and Gandolfos expertise in entrepreneurship and leadership in business development is the valuable asset to any company.

Whether you are an existing company looking for a development, a start-up company or an entrepreneur, LEODAVIN is your idea "Incubator".

Many great ideas exist because they had incubating help to grow them.

Strategic story

THE PROCESS

We would like to explain our process with a simple example.

Assume you have the idea to create the alphabetic letter T and you want to share it with the world.

Achieving the vision for an alphabetic letter T is the idea.

Being able to sketch it in the visual shape of an alphabetic letter is the first process but too often becomes the end.

As beyond this challenging and motivating idea, the full complexity of publishing a letter T onto multiple pieces of paper has not been considered.

Leodavin, the Incubator, is the complex system that brings ideas to reality.

THE INCUBATOR

At LEODAVIN, we offer 360 Degree full service solutions.

Our services include:

Management and Leadership, Financial Guidance and possible support, R&D Industrial Design and Engineering, Corporate Graphic Design, Marketing, Product and Prototype development, Supply-Chain-management and Sourcing, Patents and Licensing, Sales and Distribution.

Our role is to guide through the stages required to make your idea a success.

Treat us like a playground for your ideas.

The incubator aims to inspire, educate and help bring your ideas to the market.

We aspire to build lasting relationships with our clients in order to help the business develop and achieve the desired goals.

THINK BEYOND LIMIT

OFFICES

LEODAVIN will be present in Monaco, its head quarter.

The existing branch in Switzerland (Ruggaber Design AG) can be integrated with its R&D and Corporate expert team (due to reach of highly specialized companies / ideal for fast and professional developments).

USA office will be founded with a local team concentrating on the US and Latin market.

With these 3 global entities LEODAVIN will focus on interacting and exchanging with universities that are the breeding ground for new technologies.

STRUCTURE

LEODAVIN SARL will be founded by both Urs Ruggaber and Salvatore Gandolfo managing the company, as managing directors.

Apart from the founders and their team in Monaco and Switzerland, exists a network (developed over the past decades) of experts with high-end skills and quality at the highest level.

LEODAVIN is a service company for third parties to develop their ideas and novelties.

LEODAVIN is aiming too to successfully develop and master its own ideas and novelties into the global market.

THE PROCESS CONTINUES

It is like the idea for publishing the letter T.

You have created your T key, you put pressure on it and the complex system begins.

A lever attached to the key swings the type hammer towards the paper, propelling your T towards the paper.

A metal form of your T is built on the end of the type hammer. As the T is about to hit the paper, the ink lifts up and is pressed between the type and paper.

Finally your T is published on a piece of paper and can be recreated and shared.

The complexity is not the letter T.
The complexity is the typewriter.

LEODAVIN catalyze and manages complexity.
